Application No.: 10/079,429 Docket No.: PF106P3D1

 $\alpha'$ 

Each of the aforementioned U.S. and International patent applications are hereby incorporated by reference in their entireties.

## In the Sequence Listing:

Please replace the Sequence Listing as originally filed on February 22, 2001 with the Substitute Sequence Listing filed herewith.

## In the Claims

## Please add Claims 15-21 as follows:

- 15. The polynucleotide sequence of claim 1 for use in analyzing a sample for mutation of a polynucleotide sequence encoding a human mismatch repair protein comprising: a polynucleotide sequence of at least 15 and no more than 30 consecutive bases of the polynucleotide sequence of ATCC Deposit No. 75649.
- 16. The polynucleotide sequence of claim 1 for use in analyzing a sample for mutation of a polynucleotide sequence encoding a human mismatch repair protein comprising: a polynucleotide sequence of at least 15 and no more than 30 consecutive bases of the polynucleotide sequence of ATCC Deposit No. 75651.
- 17. The polynucleotide sequence of claim 1 for use in analyzing a sample for mutation of a polynucleotide sequence encoding a human mismatch repair protein comprising: a polynucleotide sequence of at least 15 and no more than 30 consecutive bases of the polynucleotide sequence of ATCC Deposit No. 75650.
- 18. A process for diagnosing a susceptibility to cancer comprising:

  determining from a sample derived from a human patient a mutation in a human mismatch repair gene, said human mismatch repair gene comprising the polynucleotide sequence of claim 6.

Application No.: 10/079,429 Docket No.: PF106P3D1

19. A process for diagnosing a susceptibility to cancer comprising:

determining from a sample derived from a human patient a mutation in a human mismatch repair gene, said human mismatch repair gene comprising the DNA of claim 7.

20. A process for diagnosing a susceptibility to cancer comprising:

determining from a sample derived from a human patient a mutation in a human mismatch repair gene, said human mismatch repair gene comprising the DNA of claim 8.

21. A process for diagnosing a susceptibility to cancer comprising:

determining from a sample derived from a human patient a mutation in the polynucleotide of claim 1.
